## input.1p

Java

```java
package q35974;

public class CharacterDemo2 {
    public static void main(String[] args) {
        char ch1 = 'A';
        char ch2 = 'd';
        char ch3 = '-';

        // Checking if ch1 is an uppercase character
        System.out.println("ch1 is an uppercase char: " +
                Character.isUpperCase(ch1));

        // Check if ch1 is a lowercase character
        System.out.println("ch1 is a lowercase char: " +
                Character.isLowerCase(ch1));

        // Check if ch2 is a lowercase character
        System.out.println("ch2 is a lowercase char: " +
                Character.isLowerCase(ch2));

        // Convert ch2 to uppercase
        System.out.println("ch2 to uppercase: " +
                Character.toUpperCase(ch2));

        // Convert ch1 to lowercase
        System.out.println("ch1 to lowercase: " +
                Character.toLowerCase(ch1));

        // Check if ch3 is a letter or digit
        System.out.println("ch3 is a letter or digit: " +
                Character.isLetterOrDigit(ch3));

        // Check if ch3 is a whitespace character
        System.out.println("ch3 is a whitespace char: " +
                Character.isWhitespace(ch3));
    }
}

```
